LS..K mini contactors and SH..K mini contactor relays

LS..K mini contactors are high performance devices with small dimensions. They are used for switching, even in harsh conditions, resistive loads up to 20 A and motors up to 5.5 kW / 400 V.

In the assortment, it is possible to find 3-pole contactors, 4-pole contactors and 4-pole contactor relays. These devices can be operated with standard AC or extended operating limits DC coils. Auxiliary contact blocks for front and side mounting, surge suppressors and kits for creating reversing solutions or for the connection with manual motor starters complete the offer.

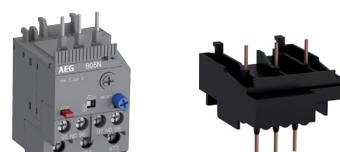

Auxiliary contact blocks

1-pole side mounting and 4-pole front mounting auxiliary contact blocks available, both with different contact configurations.

Reversing solutions

Using the VB05K mechanical interlock kit, it is possible to build a reversing contactor in very short time for a dual direction motor control.

Full protection

LS..K contactors can be easily combined with AEG protection devices in order to safeguard safety of people and equipment. The connection with MBS32NG can be done using MF32L05K link.
